

Neway Full Opening Check Valve are designed in accordance with API 6D, it is available in class rating from 150~2500lb size 2"~48" With full opening design, this series of check valve can be capable for pig ball cleaning service. To prevent potential water hammer

damage caused by disc closing, a dashpot device can be assembled to control the disc closing time. The function of a check valve is to prevent reversal of flow automatically and promptly and this type of valves are usually supplemented by gate, ball or other valves.

Seat Ring is tight seal welded into valve body, however threaded seat ring can be also designed upon request

Body gasket:
For class 150~600lb is designed with spiral wound gasket with 316 inner ring Ring joint is used for class 900lb and above

O-ring insert on disc sealing face to ensure a tight disc/seat seal

Drain Tapping
Neway swing check valves are normally provided with boss at location G, additional bosses can be provided upon request

- **Basic Design:** API 6D; ASME B16.34
- **Wall thickness:** ASME B16.34
- **End flange:** ASME B16.5, ASME B16.47
- **Butt weld ends:** ASME B16.25
- **Sour Service:** NACE MR 0175

This is atypical NEWAY series SF full opening check valve section drawing which is only for demonstrating of basic design features. The actual product design may be slightly different from this sample drawing due to its size and pressure class.
